# SC: Telecom spectrum can't be treated as asset under IBC

**BHAVINI MISHRA & GULVEEN AULAKH**  
New Delhi, 13 February

The Supreme Court on Friday held that spectrum cannot be treated as a corporate asset capable of being restructured under the Insolvency and Bankruptcy Code (IBC), placing it beyond the insolvency asset pool.

"We hold that Spectrum allocated to TSPs (Telecom Service Providers) and shown in their books of account as an 'asset' cannot be subjected to proceedings under Insolvency and Bankruptcy Code, 2016," a Bench of Justice PS Narasimha and Justice AS Chandarkar said in their ruling.

Framing the constitutional context, the court observed, "We could demystify the legal challenge by first understanding spectrum as a material resource, precisely as what our Constitution refers to as the material resource of the community."

The judgment arose from the insolvency of Aircel Limited, Aircel Cellular Limited and Dishnet Wireless Limited. After defaulting on licence fee and spectrum usage charges, the companies entered voluntary

## Red line on the spectrum

- The Bench held that IBC cannot override the telecom regime, reaffirming the Union's exclusive privilege over spectrum
- The SC ruled that spectrum is a public resource
- The apex court Bench cautioned against allowing the IBC to recast sovereign resource governance
- The SC judgment has cleared the path for DoT to take back airwaves allocated to Aircel and Reliance Communications and Videocon

said, as the process for the next round had already begun. While the spectrum locked in litigation has been freed, the resolution of the legal entity will continue to be decided by the IRP, and the DoT will not interfere in that issue, the sources added.

## Insolvency law cannot override telecom regime

In its ruling on Friday, the Supreme Court Bench cautioned against allowing the IBC to recast sovereign resource governance, and said that the statutory regime under IBC cannot be permitted to make inroads into the telecom sector and rewrite and restructure the rights and liabilities arising out of administration, usage, and transfers of spectrum, which operate under an exclusive legal regime concerning telecommunications.

"The disarray caused by applying IBC to the telecom sector, which operates under a different legal regime, was never intended by the Parliament," the bench added.

Referring to Section 4 of the Indian Telegraph Act, 1885, the court reiterated that the Union retains exclusive privilege over telecommunication systems.

"Since they haven't paid any dues and there are other non-compliances, the grounds for termination will be determined, after which licences will be cancelled and spectrum will be taken back," one of the sources said, asking not to be named.

One or more conditions may be taken into account for cancelling the licences. Licences in some circles that had earlier expired were extended by the courts, so those would now be formally cancelled.

However, the spectrum returning to the government will not be put up for auction in the upcoming round, the sources

# Ecom, gifting firms unwrap 60% growth ahead of Valentine's Day

**UDISHA SRIVASTAV**  
New Delhi, 13 February

Ecommerce and gifting platforms are seeing a 60 per cent year-on-year (Yo-Y) surge in order volume ahead of Valentine's Day, as shoppers splurge on flowers, chocolates, personalised merchandise and experiential gifts.

Industry executives said the growth is the result of digital platforms, quick deliveries in Tier-II and -III cities, demand for premium products, and aggressive promotional campaigns.

"This season, we have witnessed a 58 per cent Yo-Y spike across Valentine-relevant categories, alongside a significant 44 per cent growth in customers, underlining strong engagement as well as new customer participation," said Pratik Shetty, vice-president of growth and marketing at Flipkart.

He said there is clear demand for indulgence-led and gifting categories, with cakes and pastries recording a 7.7-times spike in units, savouries and hamkeens growing 6.6 times, cookies and biscuits up 6.5 times, chocolates at six times, and beauty products such as highlighters seeing a 2.7-times increase.

Saurabh Srivastava, vice-president at Amazon India, said demand for premium products is increasing on the platform. "As Valentine's Day continues to evolve into one of the most significant gifting moments of the year, we are seeing strong momentum across categories like chocolates, fresh flowers,

## Romance rallies retail

- Flipkart reported a 58% Yo-Y spike in Valentine categories and 44% customer growth
- Amazon India saw strong premiumisation-led momentum across chocolates, flowers, fragrances, jewellery, beauty, fashion, electronics and gift cards
- Commerce data showed over 15 mn items processed from February 1-10
- Swiggy Instamart reported up to 10x Yo-Y growth in jewellery, greeting cards and plush toys
- D2C brand websites recorded nearly 16% rise in Valentine-period order volumes
- FNP logged nearly 30% Yo-Y rise

10. While ecommerce volumes grew by about 17 per cent compared to the same period in 2025, order volumes on quick commerce platforms surged 48 per cent.

A spokesperson for quick commerce platform Swiggy Instamart said, "We've seen a massive surge in Valentine's gifting this year, with key categories like jewellery, greeting cards and plush toys growing up to 10 times Yo-Y, showcasing a clear shift towards premiumisation and curated hampers. Notably, the sexual wellness category has more than tripled."

The data from Unicommerce added that direct-to-consumer (D2C) brand websites saw a nearly 16 per cent rise in order volumes.

Avi Kumar, chief marketing officer at gifting platform FNP, said, "In the run-up to Valentine's Day, we are seeing nearly 30 per cent Yo-Y growth in orders. Growth is driven by premiumisation, improved delivery reach and higher adoption of same-day and time-specific gifting, with Tier-II cities growing faster than last year." Flowers (15 per cent), cakes (22 per cent), curated hampers and personalised gifts (30-35 per cent) are the fastest-growing categories, he said.

In an earlier conversation, Tarun Joshi, founder and chief executive officer of iGP, another gifting firm, had said that the firm expects to grow 50 per cent Yo-Y during the occasion.

## ANTI-SPAM REGULATION

### Trai examining telco responses on penalties: Chairman

**GULVEEN AULAKH**  
New Delhi, 13 February

The Telecom Regulatory Authority of India (Trai) will decide on telecom service providers' responses to the regulator's notices flagging non-compliance of anti-spam regulations and subsequent penalties.

"There are show cause notices issued to the service providers and they have

responded, those are voluminous replies and are under examination. After we can conclude on all the explanations given by them, then we will decide on the action," Trai Chairman AK Lahot said in response to questions regarding imposing financial disincentives on telcos for violation of anti-spam rules, at a media briefing on Friday.

The issue of imposing higher financial disincentives on telcos has been brewing,

with the regulator seeking sharper penal powers, including amendments in the TRAI Act, allowing for higher penalties and directing telcos to deposit a partial amount of the penalties before penalty notices are appealed. Currently, telcos are penalised ₹100,000 for the first offence and ₹200,000 for second or subsequent offences.

Trai had levied penalties of about ₹150 crore on telcos for violating Telecom Com-

mercial Communications Customer Preference Regulations, 2018 in 2024, pertaining to inability to prevent spam, which was stayed by the Telecom Disputes Settlement and Appellate Tribunal (TDSAT). The case is yet to reach the culmination stage and has been pending since.

Within a month, the timeline of implementation of the Digital Consent Acquisition (DCA) platform would be worked out, following a pilot run which has been con-

ducted by telcos and the RBI since January, the Trai chairman added. Under the pilot, telcos, in partnership with 11 major banks, will begin sending out messages to a small set of customers who can digitally review, manage, and revoke the consents they had previously given for promotional communications.

The messages, as part of system testing, will begin with a shortcode of 127000 and are likely to be received by customers whose old consents have been uploaded by the banks on the digital platform. The move will be the first step towards a unified digital consent management platform, which will ensure that pro-

motional communications are discontinued if customers revoke their consents. This will also address the issue of spam.

## Trai launches new DND & MySpeed apps

On Friday, Trai launched revamped versions of its apps — Do Not Disturb (DND) and MySpeed — to reduce spam and unsolicited calls and messages and help improve service quality. A revamped version of MyCall app would also be launched in March, which will enable consumers to file complaints about the quality of calls.
