Dear Shareholder,

As I write to you, estimates suggest disappointing growth figures for India – 6.3% GDP growth in FY2012 is the lowest recorded in the last 10 years. Global economic signals, too, are not encouraging. While USA is recovering the pace of growth is slow and unemployment levels still remain high at over 8%. Europe is in a much worse state and there are grave doubts about the continuation of the EU as a signal monetary and economic zone. Clearly, the sovereign bail-out packages post the crisis of 2008 hasn't really worked especially for southern European countries. Even, the principal driver of global growth in the past two decades – China - has shown signals of an impending slowdown.

//
**AT INFO EDGE, THE ENTIRE
CHAIN OF ACTIVITY FROM
IDEATION TO CASH COLLECTIONS
IS IMPORTANT AND INTEGRATED
TO CREATE A STRONG CULTURE
OF EXECUTION //**

Certainly, the global economy does not paint a pretty picture and the business world is going through challenging times strewn with lot of uncertainty. Amidst this general despondency, it is a pleasure to convey to you the positive developments at Info Edge in FY2012. To begin with, the Company continued to record healthy growth in revenues and profits and improved its operating profit margins.

On a consolidated basis, total income increased by 23.4% to ₹4,314 million in FY2012, while net profit after tax increased by 63.6% to ₹1,033 million in FY 2012. While on a stand-alone basis, total income increased by 29.4% to ₹4,165 million in FY2012 and profit after tax increased by 46% to ₹1,226 million in FY2012

All the individual businesses in Info Edge's portfolio including **naukri.com** (the recruitment business), **99acres.com** (the real estate business), **jeevansathi.com** (the matrimonial business) and **shiksha.com** (the education business) witnessed growth in terms of revenues and profits, improvements in critical portal operational parameters in terms of customer usage, and gains in traffic share. I urge you to read the chapter on management discussion and analysis that details the performance of Info Edge and its individual businesses during FY2012.

This brings me to two critical factors that have been the driving force of Info Edge's business – one internal and the other external.

Let me first explain the internal one, which focuses on Info Edge's strength in execution. At Info Edge, the entire chain of activity from ideation to cash collections is important and integrated to create a strong culture of execution. It is this conviction in our strength of execution that has made us continue to invest in product development, brand marketing and people over the last few years.

This is best explained by looking at some numbers since the global economic slowdown on 2008.

In FY2008, the year before the global economic crisis our headcount was 1,656. Today, at an average annual growth of 7.5% this has increased to 2,150. But, the growth in manpower has been accompanied by even greater growth in revenues. Between FY2008 and FY2012, revenues increased by 11.4% per annum to ₹3,756 million. Consequently, revenue per employee has increased from ₹1.32 million in FY2008 to ₹1.75 million in FY2012. Similarly, while advertising and promotion budgets have increased over this period, it is very important to note that productivity of such investments has improved significantly – rupee earned (Net Sales) for every rupee spent (advertising and promotion costs) increased from ₹4.55 million in FY2008 to ₹7.28 million in FY2012. All these factors have translated into healthy top line growth with steady improvements in operating profit margins over the last few years. In fact, total EBITDA margin increased from 39.1% in FY2011 to 43.6% in FY2012.

It is this ability to invest and continuously enhance productivity that drove Info Edge's competitive positioning and growth over the years, especially in the period post the global economic crisis. Apart from growth in overall markets, the improved market shares have further contributed to revenue growth.

On the external front, it is very important to appreciate and understand that 'online' businesses are in a very nascent stage of development in India. The potential market opportunities are immense and different success stories can lead to exponential growth. The important thing is the ability of these businesses to provide value propositions and user experiences that transform offline communities to online ones. This transformation is independent of the business environment and increasingly going to be a major source of growth for Info Edge. In fact, internal research suggests that a major part of 99acres.com's growth in FY2012 is attributable to the fact that builders and brokers saw perceptible benefits from using the website and invested in computers and internet connections that supplemented their on-ground operations with strong online presence.

This transformation is also driven by the growth in internet penetration and broadband access in India. Internet World Survey data suggests that by December 2011, internet users in India increased to 121 million – this is rapid growth in the last five years. However, penetration levels still remain fairly low at 10.2%. This is well below the levels of other similar developing Asian countries like China (38.4%), Indonesia (22.4%) and Thailand (27.4%). So, there is still a lot of leg-room for growth in internet usage in India.

Having said so, it is clear that 'online' businesses are starting to create a significant space in the Indian economy and they have high growth and value addition potential. Importantly, while analysing this business space, people today do not talk of how macro-economic factors affect individual business but try to gauge how these businesses will provide impetus to economic growth. In fact, a recent study by Indian Council for Research on International Economic Relations (ICRIER), The Internet and Mobile Association of India (IAMAI) and the Department of IT suggests that a 10% increase in internet penetration can increase the GDP by 1.08%. This will help the country add \$17 billion annually.

EBITDA margin increased

Revenue grew at 31% CAGR in last 6 yrs

Builders & brokers saw perceptible benefits

//
**WE ARE CONVINCED THAT IN A
YOUNG INDUSTRY LIKE OURS,
IT IS IMPORTANT TO MAINTAIN
LONG TERM INVESTMENT PLANS
IRRESPECTIVE OF BUSINESS
CYCLES //**

We, at Info Edge, are confident of the long terms prospects of 'online' businesses and the value added proposition that they bring for their users. In most segments in the online business space, market leaders are defining the contours of growth for the overall segment. We believe that maintaining a leadership position and driving innovation within their respective segments is critical for the future

prospects of each of our businesses. With this belief, Info Edge remains committed to making investments across its different businesses for product development, branding and skill enhancement. As a Company, we are convinced that in a young industry like ours, it is important to maintain long term investment plans irrespective of business cycles. We have always done so and will continue to do so even if this translates into a drop in operating margins in the short term.

Last year, I had reported to you about the new thrust in investing in start up ventures. This was primarily structured to participate in the growing Indian internet industry, promote entrepreneurship and invest

in cutting edge ideas and technology. We have made investments into *meritnation.com*, *policybazaar.com*, *zomato.com*, *mydala.com*, *floost.com* and *99labels.com*. Investments in all the investee companies have been early stage ones. The first thing we look at it is the quality of the team and only then we look at market potential, market size. Next, we look at the competitive position or the competitive situation in the space we want to enter. In general, we want to invest in companies that are first movers or early movers. We remain committed to these investments, including participating in the next round of investments. Operationally, we are closely monitoring the evolution of these business models.

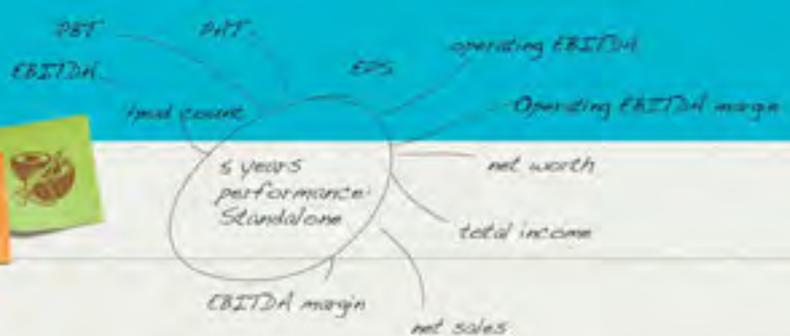

We have a well balanced portfolio of businesses in the online classifieds space. Info Edge is strongly committed to grow the businesses in this portfolio. This growth ambition integrated with focus on execution excellence will be the fundamental driver for the business in the next few years. Also, one expects inflection points where en mass people move to using the internet as a medium of information exchange and open up large markets. Economic conditions are going to be difficult in the next couple of years, but our competitive strength and the rapid growth of markets for online businesses, position us well for the future.

We will have to continue to focus on excellence in innovation and execution. I am confident of my team and its ability to deliver on these fronts in the coming years.

Finally, I would like to take this opportunity to thank you for your continued support. Our business is well positioned for big-ticket growth. With the dedication of our employees and your encouragement, Info Edge is confident of delivering sustained value.

Regards
Hitesh Oberoi

Overview

THE INTERNET AND THE WORLD-WIDE WEB HAS BEEN ONE OF THE MOST INFLUENTIAL TECHNOLOGY-DRIVEN DEVELOPMENTS THAT HAS AFFECTED HUMAN LIVES ACROSS THE WORLD IN THE LAST COUPLE OF DECADES. FUNDAMENTALLY, IT IS JUST A NEW MEDIUM OF COMMUNICATION BUT ITS IMPACT ON THE WAY PEOPLE LEAD THEIR LIVES HAS BEEN PHENOMENAL. INFO EDGE (INDIA) LIMITED ('INFO EDGE' OR 'THE COMPANY') HAS LEVERAGED THIS MEDIUM TO EVOLVE A RAPIDLY GROWING BUSINESS BASED ON THE CORE MANTRA OF DEVELOPING DIFFERENT PLATFORMS FOR 'ON-LINE' CLASSIFIEDS. IN THIS SPACE, THE COMPANY HAS EMERGED AS A PIONEER AND AN INDUSTRY LEADER IN INDIA.

The Company's business model has evolved on a principle of 'being local, thinking global'. In essence, what this means is that it has laid much emphasis on understanding the dynamics of communities that interact in the physical space often at a very local level and transformed their interaction onto the global platform of the world-wide-web. In that sense, it has targeted specific market segments within India utilising technological tools that are state-of-the art from a global perspective.

While the on-line medium is a key differentiating factor for the Company, it is important to appreciate that within this space Info Edge has always focused on enhancing its execution excellence to deliver results and drive its leadership positioning.

Clearly, execution excellence is all about hitting the bottom line - delivering results based on objectives but it is important to appreciate that such a successful execution orientation encompasses a gamut of activities right from conceptualisation to collection of cash.

These include:

- **STRESS ON IN-DEPTH ANALYSIS OF THE DOMAIN** and the functioning of the specific community in the offline space so that the online interaction can be an even better experience

- **PRACTICAL IDEATION OF THE END PRODUCT.** At the very concept stage, the Company details the specifications so that the market need defines the end product while technology is an enabler and driver yet not the deciding factor
- **EMPHASIS ON A BUSINESS PLAN** that not only looks at product development but also brand building, customer connect, distribution mechanisms and revenue models
- **EFFECTIVE MANAGEMENT** of the different phases of a product life cycle – when to invest, when to focus on tightening costs or when to revamp a product
- **CONTINUOUSLY SUPPORT THE PRODUCTS** through cutting edge technology
- **FOCUS ON REGULAR IMPROVEMENTS** in the online customer experience

Today, Info Edge is a portfolio of different businesses, all in different stages of their product life cycle yet unified under the single umbrella of the 'online classifieds' business space. [Box 1](#) details the different businesses.

Across these businesses, the Company has focused on its execution excellence. Given that each one of these portfolios is in a different stage of development, there was varying level of emphasis on different aspects of execution for the different businesses during financial year (FY) 2012. Having said so, it is important to

note that these initiatives were well calibrated so that Info Edge, as a Company, had the right balance of growth in profits and cash generation on the one hand and the essential nurturing and development investments in assets for future growth, on the other.

Info Edge's business structure is such that the stand-alone numbers reflect the performance of the core business and the developmental businesses broadly classified as 'other businesses'. A portion of the cash generated from the stand-alone business is invested into investee companies, which are all early stage companies/ still being incubated.

Financial Review

The revenues sources for the stand-alone business are detailed below:

- **RECRUITMENT SOLUTIONS** through its websites - *naukri.com*, *naukrigulf.com* and *firstnaukri.com*. Revenue is generated in the form of subscription fees, which is recognised pro-rata over the subscription or advertising agreement, usually ranging between one to twelve months
- **REAL ESTATE WEBSITE** - *99acres.com*, **EDUCATIONAL CLASSIFIEDS WEBSITE** - *shiksha.com* and **MATRIMONIAL WEBSITE** - *jeevansathi.com* and Revenue is received in the form of subscription fees, which is recognised over the period of subscription, usually ranging between one to twelve months
- **PLACEMENT SEARCH DIVISION** - Quadrangle. Revenue is received in the form of fees, for placements at various levels in a client's organisation. Revenue is recognised on the successful completion of the search and selection activity

The Company collects these subscription fees in advance & recognises these as revenue as the service is delivered.

For these businesses, the un-accrued amounts are not recognised as revenue till all the obligations are fulfilled. In the interregnum, these are reflected as deferred sales revenue under current liabilities in the balance sheet.

- **RESUME SALES SERVICE** - Naukri First Forward. The revenue is earned in the form of fees and is recognised on completion of the related service

On consolidation, while the PAT of the associates gets added in proportion to shareholding, the ones of the subsidiaries are fully accounted for in the revenues & costs.

Table 1 gives the abridged profit and loss statement for Info Edge for FY 2012.

There are two points to note in terms of treatment of accounts. First, the exceptional item recorded in FY2012 is on account of provision for diminution in carrying value of investments in Info Edge (Mauritius) Ltd. This subsidiary company had made an investment into Study Places Inc USA in FY 08. The comparable amount in FY2011 included the profits from sale of stock in MakeMyTrip Ltd, Mauritius (MMT). The company had acquired these shares at cost from Mr. Sanjeev Bikhchandani which were allotted to him under the ESOP scheme of MMT. Second, for the purpose of consolidation, Etechaces (*policybazaar.com*)

was accounted for as a subsidiary in FY2011. In FY2012 with Intel Inc coming in as a co-investor it has transformed into an associate Company. Consequently, only PAT is now accounted for in proportion to stake held. This transformation has resulted into reversal/adjustment in minority interests and share in losses of associates for both FY2011 and FY2012

Box 2 lists the performance highlights of Info Edge, the stand-alone entity, while Box 3 lists the performance of Info Edge, the consolidated entity. The difference between the two performances is on account of the developments in the investee companies. The investee companies being in early stage are currently in investment mode and therefore are incurring losses. Consequently, while the revenues are higher at consolidated level the consolidated profits are lower than those on stand-alone entity basis.

The performance in FY2012 vindicates Info Edge's strategy of maintaining its long term business strategy for different businesses irrespective of short term changes in the business environment as long as fundamental market dynamics are in line with expectations. This needs some explanation.

Info Edge has continued to invest in brand building, product development and people in a calibrated manner according to the needs of the respective businesses. These investments have played a key role in improving the Company's competitive edge in the market and gain critical market share. In new-age businesses like the ones where Info Edge is active, the market leader has a distinctive advantage and benefits extensively from its leadership position in terms of attracting customers. Info Edge has always strived to maintain this leadership position and for its two largest businesses – *naukri.com* and *99acres.com* – it continued to gain traffic share in FY2012.

While the Company continues with investments in internal businesses, efforts are made at improving productivity and efficiencies of such outlays. A case in point is that the total headcount increased by 22% from 1,768 in FY2011 to 2,150 in FY2012 and total employee costs on a standalone basis increased by 20.5%. The Company has, however, made the most of this increase to promote revenues. Consequently, on a standalone basis, employee cost to sales reduced from 38.7% in FY2011 to 36.5% in

KEY OPERATING RATIOS

	FY2012	FY2011	FY2012	FY2011
Network and other charges	2.5%	3.4%	2.7%	3.4%
Employees Cost	36.3%	38.7%	37.8%	39.7%
Advertising and Promotion Cost	13.7%	12.9%	14.4%	15.7%

FY2012. Similarly, on a consolidated basis this ratio reduced from 39.7% in FY2011 to 38% in FY2012.

Table 2 lists the different cost ratios and operating profits as a ratio of operating income for both the consolidated and standalone results

Importantly, even after increasing brand building and promotional activities as reflected in the increase in advertising and promotion costs to sales ratio from 12.9% in FY2011 to 13.7% in FY2012, on a stand-alone basis (on a consolidated basis this ratio reduced from 15.7% in FY2011 to 14.4% in FY2012 because the investee companies are in a nascent stage of development with low requirements of brand promotion), the operating EBITDA increased from 42.8% in FY2011 to 48.2% in FY2012 (stand-alone) and from 33.7% in FY2011 to 39.7% in FY2012 (consolidated).

Apart from effective management of employees and advertising, this improvement is also a reflection of the high operating leverage of the business. Once the foundations are put in place, growth in scale of operation continues to give greater returns for every incremental rupee spent. **This, along with a corporate culture of tight cost management has resulted in the following:**

- **REDUCTION IN COSTS** of network and other charges from 3.4% in FY2011 to 2.5% in FY2012 (stand-alone) and from 3.4% in FY2011 to 2.7% in FY2012 (consolidated)
- **REDUCTION OF OTHER OPERATING EXPENDITURE** from 11.6% in FY2011 to 9.8% in FY2012 (stand-alone) and from 16% in FY2011 to 15.5% in FY2012 (consolidated)

This financial performance in terms of operational parameters further highlights the Company's focus on excellence in execution.

With these results, Info Edge continued to

generate cash. On a stand-alone basis, Net cash flow from operating activities increased by 14.4% from ₹1,101 million in FY2011 to ₹1,259 million in FY2012. The cash and cash equivalents were ₹2,662 million as on 31 March 2012 against ₹2,037 million in FY2011 – an increase of 30.7%. The total Cash and cash equivalents including investments in mutual funds were ₹5080 million as on March 31, 2012 as against ₹4639 million as on March 31, 2011 – an increase of 9.5%.

DEFERRED SALES REVENUES INCREASED BY 32.9%

It should also be noted that deferred sales revenues, which is cash collected during the year that are yet to be recognised as revenue through accounting principles, has increased by 32.9% from ₹895 million as on 31 March 2011 to ₹1,189 million as on 31 March 2012. This gets recognized and accounted for on a pro-rata basis over the subscription or advertisement agreement period. It reflects the strength of the Company's market position even in a difficult year in terms of the external environment

From the cash generated through the stand-alone performance, Info Edge continues to prudently manage its treasury function. Non-current financial investments increased by 207.5% from ₹934 million in FY2011 to ₹2,872 million in FY2012.

- Strategic investments including equity, preference shares and debentures into subsidiary and associate companies increased by 280.4% from ₹367 million FY2011 to ₹1,396 million in FY2012. These were in line with the commitments made while taking additional stakes in some of the investee companies.
- In addition, investment in long term mutual funds increased by 160.3% from ₹567 million in FY2011 to ₹1,476 million in FY2012.

Core Business - Recruitments

The recruitment services business comprises the following portals:

- **NAUKRI.COM:** This is the Company's flagship brand and India's largest online jobsite
- **NAUKRIGULF.COM:** This is a jobsite that focuses on the middle-eastern market
- **FIRSTNAUKRI.COM:** Launched in January 2009, this site focuses on fresher hiring
- **QUADRANGLE.COM:** This is primarily an off-line headhunting business that derives revenues from successfully positioning a person with a company

Much of today's revenues and profits are delivered by the Naukri.com business and it is affected by developments in the external economy.

BUSINESS ENVIRONMENT

There has certainly been a slowdown in the Indian economy. For Q4, FY2012 (or January to March 2012), GDP growth has fallen to 5.3% compared to the same quarter in the previous year. From a high of 9.4% in January-March 2010, this is the eighth successive quarter of declining GDP growth - a drop of 4.1 percentage points over two years. Even more worrisome is the sharp decline

in each quarter of 2011-12: 8% in Q1; followed by 6.7% in Q2; then 6.1% in Q3; and now 5.3% in Q4. Not surprisingly, therefore, GDP growth for the full year is much lower — 6.5% in FY2012, which is 1.9 percentage points below the 8.4% we achieved in FY2011. **Chart A** plots the data.

Clearly, such an economic slowdown and the associated negative sentiment will have a negative impact on the recruitment industry. However, the overall impact so far has been muted with some sectors doing well to compensate for slowdown in others. Noticeably, three sectors were badly affected through the year – insurance, construction and telecom. However, the other sectors compensated for this slowdown and as **Chart B** shows that the 'Naukri Jobspeak Index' shows a steady state in the recruitment industry through FY2012.

The Naukri Jobspeak Index is an in-house index based on utilisation of listings on our website- Naukri.com

Naukri.com benefited immensely from the support of the large sales force that is on the ground. Most of sales force in Info Edge is engaged in *naukri.com*. The efficiency of the sales force has also been improved through effective implementation of the ERP system. In addition, there are constant efforts at product improvement and enhanced customer experience. All these drivers combined with the fact that *naukri.com* has a self-generating cycle of sustainable growth emanating from its first mover advantage have contributed to further strengthening of its market leadership position.

Chart C shows that *naukri.com* has gained significantly in terms of traffic share. Data from comscore.com suggests that by the end of

FY2011, in terms of traffic flow, the gap between *naukri.com* and its nearest competitor was 27% and with the second nearest competitor was 38%, by the end of FY2012 this gap has widened further to 43% and 49% respectively. This market leadership promotes another round of growth through gains in market share.

Info Edge continues to grow *naukri.com* by investing in the brand, hiring and retaining quality talent, providing superior sales and service execution and continuous innovation on product and technology.

naukri.com is supported primarily by four offerings that complete the Company's service suite in the recruitment space: *firstNaukri.com*, *naukrigulf.com* and *Quadrangle*.

The new business model should effectively deliver and service the specific new hiring segment and support the core business

naukrigulf.com continued to be consolidation mode with the slowdown in the middle east recruitment market. The business is supported by branch offices in Dubai, Riyadh (Saudi Arabia), Bahrain and Abu Dhabi.

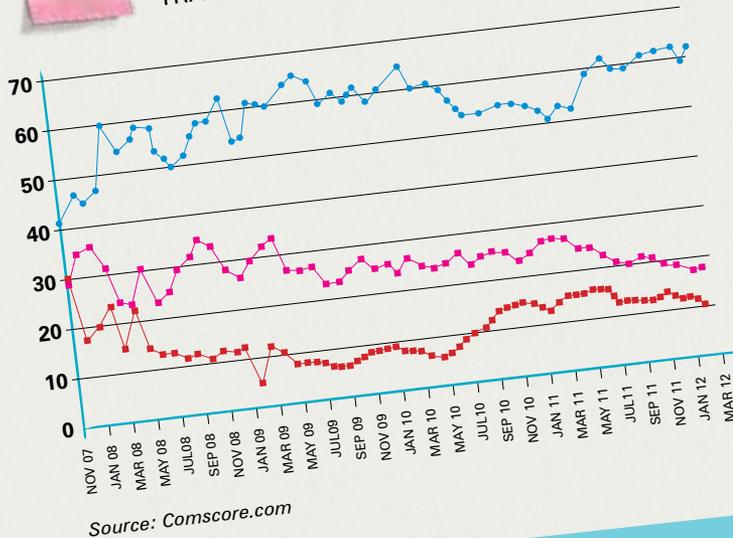

Quadrangle, offers off-line placement services to middle and senior management, with revenues based on a success fee model. It complements the online recruitment business. Quadrangle witnessed a marginal slowdown during FY2012, especially after a 15% drop in sales in Q4, FY2012

Other Businesses - Real Estate, Matrimonial & Education

The 'other businesses' portfolio comprises businesses that are in different development phases. While *99acres.com*, *jeevansathi.com* and *allcheckdeals.com* are in the second stage of development, *shiksha.com* is in an early stage of development.

The other businesses portfolio continued to grow and increase its share in the Company's total sales. Net sales increased by 39.4% from ₹512 million in FY2011 to ₹714 million in FY2012. With this growth its share in total revenues increased from 17.4% in FY2011 to 19% in FY2012. In a gradual but steady manner the development of these 'other businesses' is reducing the Company's overall reliance on naukri.com and enhancing the wider portfolio based growth strategy of Info Edge. However, in the near term, naukri.com will continue to be the predominant business.

Real Estate

Within the real estate space, Info Edge has two portals. These are (i) *99acres.com*, the property based online classified business, and (ii) *allcheckdeals.com*: the property broking business with a success based revenue model. While the two portals are parts of the real estate business,

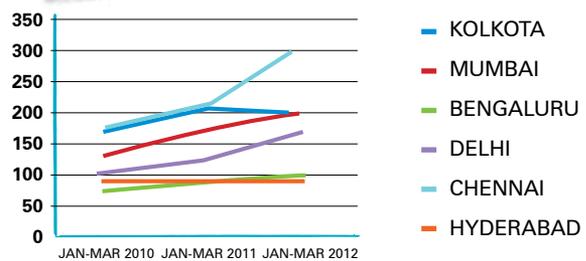

allcheckdeals.com was hived off as a separate subsidiary during Q3, FY2010 - so as to create specific business focus. Thus, the financials of the two businesses are now separate

BUSINESS ENVIRONMENT

The real estate sector in India was adversely affected on two fronts. First, the policy framework restricted flow of debt into the sector and the investment environment was very subdued adversely affecting real estate companies' ability to refinance their existing loans. This led to a slowdown in construction activities of projects under execution. Second, the negative sentiments on the economy coupled with high levels of interest rates delayed home purchases amongst consumers and slowed down demand. Commercial leasing demand was also affected as companies operating in India struggled to manage costs in depressed markets.

NHB RESIDENTIAL PROPERTY PRICE INDEX

Note: All prices indexed to 100 for the year 2007

While the dampeners were there, real estate developers continued to launch new projects. The National Housing Bank (NHB) index for residential property prices across shows most cities saw real estate prices stable or increasing.

Therefore, while FY2012 has been a bit of a dampener for the real estate sector in India, the intrinsic need and demand for housing sector growth continues to exist in the India economy. More importantly for Info Edge, the real estate industry in India is evolving in its way of working. Today, the market is primarily end customer driven and developers and brokers have to reach out to these widely spread out customers in the most cost effective manner. And, the use of the internet is gaining acceptance as a medium of sales and marketing.

OPERATIONS REVIEW

Catering primarily to real estate developers, builders and brokers, *99acres.com* source of revenue is from property listings, builders' and brokers' branding and visibility through micro-sites, home page links and banners. Individuals too list their requirements like sale, purchase and renting on the site. **Box 5** gives the financial performance highlights of *99acres.com*

The usage parameters highlight major traction in revenue generating traffic.

Box 5 99acres.com- Performance Highlights

- **NET SALES FROM 99ACRES.COM** increased by 52.2% to ₹347 million in FY2012.
- **OPERATING EBITDA CONTINUED TO BE POSITIVE** – ₹1 million in FY2012
- Given the focus of the site to promote greater revenue generating traffic the number of listings reduced, while the **NUMBER OF PAID TRANSACTIONS ROSE** from around 23,700 in FY2011 to 33,250 in FY2012

- **NUMBER OF LISTINGS IN 99ACRE.COM'S DATABASE INCREASED BY 65.1%** — from around 774,000 at the end of FY2011 to around 1,278,000 at the end of FY2012.
- **NUMBER OF PAID LISTINGS INCREASED BY 67.7%** — from 632,000 at the end of FY2011 to 1,060,000 at the end of FY2012.
- **NUMBER OF PAID TRANSACTIONS GREW BY 40.3%** — from 23,700 at the end of FY2011 to 33,250 at the end of FY2012

During FY 2012, Info Edge continued to invest in *99acres.com* on product development, people, and marketing and brand building. In the process, it is slowly gaining traffic share from the second half of FY2012, after losing some traffic share in the first half. More importantly, as reflected in the usage data it is getting higher revenue generating traffic. Finally, the site has managed to spread the message of utility amongst the real estate sales community and in the process succeeded in increasing the use of the internet within this community.

allcheckdeals.com is the group's online property broking business. The business has a commission based revenue model that is determined on the value of transaction. The focus is on the residential markets of larger cities and their suburbs where it can service a growing middle class who want ease of transactions in property deals. The business has extended its coverage to 12 cities in India.

The business, which is in a subsidiary now, closed about 1,900 sales transactions in FY2012. The operating environment was difficult. There were also business issues like the land related disputes in Noida and Greater Noida - our primary market – and an internal re-organisation exercise. *allcheckdeals.com* generated a top-line of about ₹108 million in FY2012 made losses at the EBITDA level of ₹ 36 million.

Matrimonial

The online matrimonial business is not affected by annual vagaries of the macro-economy and business environment. It is, however, largely influenced by demographic factors and social behavioural patterns. It is a very challenging market with several nuances.

The fundamental driver of growth comes from India's demographic dividend. Estimates suggest that today, there are around 450 million people

Box 6

Matrimonial- Performance Highlights

- **NET SALES FROM MATRIMONIAL** increased by 14.9% to ₹254 million in FY2012
- **OPERATING EBITDA LOSS** was ₹49 million in FY2012
- **PROFILE LISTINGS INCREASED** from 4.3 million at the end of FY2011 to 5.8 million at the end of FY2012
- **AVERAGE AMOUNT REALISED PER CUSTOMER INCREASED** from ₹2,722 in FY2011 to ₹3,120 in FY2012

below the age of 21. This is a large young population that will reach marriageable age soon. Today, this business primarily targets the dominant tradition of arranged marriages and strives to convert offline information exchanges done by parents and elders in this space to online ones. The market is however very fragmented as there are very different cultures and norms across the wide spectrum of socio-religious communities in India.

In this scenario, Info Edge has focused on actively promoting *jeevansathi.com* amongst north Indian communities and establishing strong leadership position in this market segment. While focusing on gaining market share, there is stress on maximising the flow of paid customers.

The website has revenue model, which is free to list, search and express interest, but pay to get contact information. The highlights of the portal's performance are given in [Box 6](#).

The online business is being supplemented by 14 offline centres called 'Jeevansathi Match Points'. These centres provide hand-holding services to customers who are not internet savvy, helping them to utilise *jeevansathi.com* online services. The offline centres have walk in sales for matching services.

Education

Education is another business that is fairly insulated from macro-economic developments and is largely dependent on long term demographics. From an online perspective classifieds in education is at a very nascent, however, the market for education related advertising is very large with most spends being in the print space. In fact, of the total estimated ₹25 billion spent in this market, only around an estimated ₹400 million is in the online medium. With increase in private sector participation in this sector, advertisements spends are also increasing. The challenge is to convert offline advertising to the online space.

Launched in May 2008, **shiksha.com** is primarily a portal for information exchange for the post school education options. Revenues are generated from advertisements placed by colleges, institutes and universities. There may be scope for additional revenues from successful leads.

Broadly, there are three categories of clients:

- Indian education players (universities and institutes)
- Test preparation and coaching institutes
- Overseas universities and colleges targeting Indian students

THE MARKET FOR EDUCATION RELATED ADVERTISING IS VERY LARGE WITH MOST SPENDS BEING IN THE PRINT SPACE

The website is gaining good traction. Although on a small base, revenue growth was 85% in FY2012. *shiksha.com* has succeeded in renewing contracts with most customers and increased booking offerings. It has also significantly grown its traffic to around 50,000 students per day.

Investee Companies

In addition to promoting businesses internally, Info Edge recognises that ideation and the spirit of enterprise are key elements for success in developing businesses in the online space. With this perspective, the Company has made investments in early stage start up ventures with an objective to support in the growth of these

entrepreneurial driven business and gain from the enhanced value creation or take the Company into the Info Edge fold if opportunity arises in future.

The details of such strategic investments are listed below:

- Info Edge has invested ₹318 million in tranches for around 49% stake in Applect Learning Systems Private Limited. Applect has launched a site called *meritnation.com*, which is delivering kindergarten to Class 12 (K-12) study material. The site is managed by an experienced team that specialises in content development and assessment modules in the education space and has a strong commitment to delivery. The site provides:

- online educational assessment based learning tools for school students
- free solutions mainly for mathematics and science for standard 6 to 12 of popular national curriculum like CBSE and ICSE. It has added some state board curriculums as well.
- paid product for online assessment and teaching solutions

- Info Edge has invested ₹300 million in Etechaces Marketing & Consulting Private Limited. Intel Capital is the co-investor. The investee company operates an online financial products comparison website, *policybazaar.com*. This started as a site for comparing insurance products & subsequently added other financial products like home loans, car loans and personal loans are also being added for inter-se comparison of financial products prior to purchase. The business has been affected a bit due to regulatory issues like the upper bound for charges for insurance leads being restricted to ₹10. In this environment, the business is making effort to grow and it is also laying emphasis on distance marketing and advertising.

- The Company has invested ₹182 million in *zomato.com* (erstwhile foodiebay.com). It provides menus of restaurants and reviews and ratings of the same and tickets for events. Revenues are generated from advertisements of restaurants and lead sales. It has a wide coverage across 10 cities including Delhi, Mumbai, Bangalore, Pune and Hyderabad. The website also has a very well designed mobile application. It has also sold tickets for events during FY2012, which got a good response. The product has been well received in the market and one will have to wait for a few years before it can be scaled up considerably.

- Info Edge has invested ₹270 million into *mydala.com*, which a website offering discount offers & deals and a platform for merchants. Revenues are generated form merchant commissions.

INFO EDGE RECOGNISES THAT IDEATION AND THE SPIRIT OF ENTERPRISE ARE KEY ELEMENTS FOR SUCCESS IN DEVELOPING BUSINESSES IN THE ONLINE SPACE

- Info Edge has also invested ₹235 million (including a portion for secondary share purchase) into *99labels.com*, which is an e-commerce website offering discount offers and deals for fashion merchandise and accessories. Revenues are generated through sales of fashion & home products.

- The Company has invested in Nogle Technologies Pvt. Ltd, which is developing a unique web sharing platform *floost.com* whose business model is yet to evolve.

The Company continues to evaluate more such possible investments while conscious of the funds requirements of the existing Investee Companies.

Outlook

Given global developments and issues within India, one expects the economic slowdown to continue for at least another year. This may have an impact on both the recruitments and the real estate business.

However, one expects this slowdown to be offset by the rapid transformation of several offline functions to online ones.

From a demographic perspective, clearly, the age profile is supportive of Info Edge's business. India is one of youngest countries with a median age of 26 years, and around 65% of its population is below 35 years of age. The youth population between 15-35 years, which is Info Edge's target market, is growing at a rapid rate of 37.9%. In some sense the conversion into online will be the driving factor for Info Edge's growth in the next phase along with the demographic tilt towards younger generations.

This is being supported by rapid spread in internet penetration, mobile phone penetration and availability of low priced smart phones in the country. And, India's Internet consumer profile mix is changing to broadband and heavier usage. Broadband users engage in multiple internet activities on a daily basis providing greater scope for online services.

This long term perspective has driven Info Edge to continuously invest in its products and strive to attain market leadership in each segment. If there is some downfall in revenue growth in the short term, one might a slight reduction in margins as Info Edge will not cut down on its growth oriented investments into different products.

Risks

The Company has a well structured and robust risk management mechanism, which includes a comprehensive risk register that lists the identified risks, its impact and the mitigation strategy. **Broadly, there are some over-riding risks that are listed below:**

OPERATIONAL RISKS

- **BUSINESS CONTINUITY:** Technical failure and breakdowns in servers could lead to interruptions of our websites and could result in corruption of all data and/or security breaches.
- **OBSOLESCENCE:** Being a company that uses technology extensively, one is always faced with the risk of an innovation or product development that make Info Edge's propositions redundant. The Company remains alert with technology developments to overcome this risk. A case in point is the investments being made on mobile based applications.
- **DISASTER RECOVERY** – Though a replica of databases is maintained, its corruption or inability to restart could pose a problem.

STRATEGIC RISKS

- **COMPETITION RISK:** All the portals have competition directly on the online space and the offline. Info Edge continuously tracks competition in every one of its businesses and stays prepared for the challenges

- **DEPENDENCY RISK:** The Company relies heavily on the recruitment business for its profits and cash flows. It has a large dependency on this one line of business. Info Edge has been consciously diversifying into other businesses to de-risk itself from this dependency. Already, the other businesses have started contributing around 19% of its total revenues

- **INVESTMENT RISK:** The Company has made investments into start-ups. There is a probability that this entire investment might not generate any returns and in fact absorb more cash in the incubation phase. These are risks, which are part of the Company's growth strategy

FINANCIAL RISKS

- **TAX ISSUES:** the Company has a few income tax and service tax cases against it, which if lost may impact future cash flows, though not materially.
- **ERP:** In order to promote efficiencies the Company has deployed ERP and other softwares across its activities. Any errors in billing or financial reports in the ERP system could affect the Company's billing and statutory reporting

MANPOWER & REGULATORY RISKS

- **EMPLOYEE ATTRITION:** Being a knowledge driven business any form of major Human Resource attrition may affect the course of the business. The Company is focusing on making workflows as process-driven as possible
- **CONTENT LIABILITY:** Most of the portals rely on information being posted by users. Fraudulent postings/profiles on the website, spamming by some of the users may damage the Company's reputation and make it vulnerable to claims e.g. defamation & invasion of privacy
- **IPR PROTECTION:** The Company has been protecting its Trade Marks to the extent it makes commercial sense. However, adoption of generic marks to identify our services/products is something that exposes the marks to widespread possibility of accidental/unintentional infringement/passing of by others & increasing the possibility of engaging in unceremonious litigation

Internal Controls and their Adequacy

Info Edge has proper and adequate system of internal controls to ensure that all assets are safeguarded and protected against loss from unauthorised use or disposition, and those transactions are authorised, recorded and reported correctly.

The internal control is supplemented by an extensive programme of internal audits, review by management and the Audit Committee, and documented policies, guidelines and procedures. The internal control is designed to ensure that financial and other records are reliable for preparing financial information and other data, and for maintaining accountability of assets.

Cautionary Statement

Statements in this Management Discussion and Analysis describing the Company's objectives, projections, estimates and expectations may be 'forward looking statements' within the meaning of applicable laws and regulations. Actual results might differ substantially or materially from those expressed or implied. Important developments that could affect the Company's operations include a downtrend in the Indian online sector, advertising spends, new disruptive technologies or business models, significant changes in political and economic environment in India, exchange rate fluctuations, tax laws, litigation, labour relations and interest costs.

OPERATIONS REVIEW

While the other businesses are gaining traction, your Company's primary revenue generator is still the online recruitment classifieds and related services through *naukri.com*. With improvements in the Indian economy and hiring picking up, recruitment solutions had a good year in 2011-12. Net sales from recruitment increased by 25.4% from ₹2,425 million in FY2011 to ₹3,042 million in FY2012. Operating EBITDA from recruitment increased by 41.2% from ₹1,098 million in FY2011 to ₹1,550 million in FY2012.

With revenues from these other verticals increasing by 39.4%, their combined contribution to the company's net sales increased to 19% in 2011-12. *99acres.com* grew by 52.2% and *shiksha.com* grew by 85%. However, the Company would invest more to scale up these businesses in FY 2012-13.

Detailed analysis of the performance of the Company and its businesses has been presented in the section on Management Discussion and Analysis of this Annual Report.

FUTURE OUTLOOK

The macro-economic scenario will be challenging in the next couple of years. The global economy has to deal with slow and sporadic improvements in USA, complete economic recalibration in Europe and lower than usual growth in China. While these external developments will to some extent affect the Indian economy, much of the economic slowdown in the country is due to internal reasons emanating from issues related to socio-politics, environment and slow decision making by key governmental agencies.

In this macro-economic milieu, while Info Edge's business might witness some slowdown, much of it will be offset by the growing transformation of physical transactions into online ones. In addition, the online infrastructure is continuing to grow in India. Internet penetration and broadband usage continued to show strong secular growth trends and even today they are on the lower side in terms of penetration when compared to similar developing countries in Asia. Therefore, the potential for growth of internet enabled businesses is immense.

At Info Edge, we believe in this potential and are going to invest in all our businesses primarily on people, product development, marketing and brand building. The aim is to be domain leaders driving the internet led economic growth of the country. For FY-2013, we remain cautiously optimistic. The recruitment business is expected to

maintain its growth momentum. The real estate business has shown all signs in FY-2012 of being close to the point of inflection for rapid growth. The matrimonial business is expected to strengthen its market position in its niche segments in north India, while the education business is developing impressively. For your Company, FY2013 will be about gaining from growth in the overall internet market and further consolidating its position by focusing on gaining market share. The investee companies are still developing their business models and will gain some visibility on future prospects in the next 2 to 3 years

38. The exceptional item in the year ended March 31, 2012 represents provision for diminution in the carrying value of investment of ₹8.33 million in Study Places Inc. The exceptional item in the year ended March 31, 2011 represents provision for diminution in the carrying value of investment of ₹3.75 million in Study Places Inc offset by the profit on sale of equity shares of MakemyTrip Limited, Mauritius amounting to ₹55.49 million (₹37.06 million net of Tax).
39. The accounts of some of the subsidiaries and the associate company considered in consolidation have been prepared on a going concern basis despite significant erosion in their net worth. The applicability of the going concern assumption is considered to be appropriate on the basis of the business activities of these companies, together with the factors likely to affect their future development and performance along with their financial position and projected cash flows. These have been reviewed by the respective Board of Directors and they have a reasonable expectation that these companies have adequate resources to continue in operational existence for the foreseeable future.
40. For the purpose of consolidation of financial statements of the company as regards the investments in Associate companies:
- (a) Unaudited Profit after tax of Ninety Nine labels Private Limited has been considered. It is unlikely that the audited results would be materially different from unaudited financial statements.
- (b) Unaudited financial statements of subsidiaries of Etechaces Marketing & Consulting Pvt Ltd have been considered. It is unlikely that the audited results would be materially different from unaudited results.
41. Contingent Liability - Claims against the company not acknowledged as debt include demand from the service tax authorities for payment of service tax of ₹4.68 million and income tax authorities for payment of income tax of ₹ 1.22 million. The company is contesting the demand and the management believes that its position will likely be upheld in the appellate process. No tax expense has been accrued in the financial statements for the tax demand raised. The management believes that the ultimate outcome of this proceeding will not have a material adverse effect on the Company's financial position and results of operations.
42. The financial statements for the year ended March 31, 2011 had been prepared as per the then applicable, pre-revised Schedule VI to the Companies Act, 1956. Consequent to the notification of Revised Schedule VI under the Companies Act, 1956, the financial statements for the year ended March 31, 2012 are prepared as per Revised Schedule VI. Accordingly, the previous year figures have also been reclassified to conform to this year's classification. The adoption of Revised Schedule VI for previous year figures does not impact recognition and measurement principles followed for preparation of financial statements.

NOTES TO THE FINANCIAL STATEMENTS - 31 MARCH 2012

1 GENERAL INFORMATION

Info Edge (India) Mauritius Limited (the "Company") is a limited liability company incorporated and domiciled in Mauritius. The address of its registered office is c/o Abax Corporate Services Ltd, 6th Floor, Tower A, 1 Cybercity, Ebene, Mauritius. The Company holds a Category 1 Global Business Licence and its main activity is to act as an investment holding company.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below:

Basis of Preparation

The financial statements have been prepared in accordance with and comply with International Financial Reporting Standards ("IFRS"). The financial statements have been prepared under the historical cost convention as modified by the fair valuation of available-for-sale financial assets.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the directors to exercise their judgement in the process of applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The directors have considered estimates and judgement as disclosed in note 3.

Changes in accounting policy and disclosures

(a) Amendments to existing standards effective during the year

The following amendments to standards are mandatory for the year beginning 1 January 2011:

Standard	Title
IAS 1	Presentation of financial statements
IAS 24	Related party disclosures
IFRS 7	Financial instruments - Disclosures

The amendment to IAS 1, 'Presentation of financial statements' is part of the 2010 Annual Improvements and clarifies that an entity shall present an analysis of other comprehensive income for each component of equity, either in the statement of changes in equity or in the notes to the financial statements. The application of this amendment has no significant impact as the Company was already disclosing the analysis of other comprehensive income on its statement of changes in equity.

The amendment to IAS 24 clarifies and simplifies the definition of a related party and removes the requirement for government-related entities to disclose details of all transactions with the government and other government-related entities. The Company is now required to disclose any transactions between its subsidiaries and its associates. Additionally, an entity that is controlled by an individual that is part of the key management personnel of another entity is now required to disclose transactions with that second entity. The application of this amendment does not have a significant impact on the Company's financial statements.

The amendments to IFRS 7, 'Financial Instruments - Disclosures' are part of the 2010 Annual Improvements and emphasises the interaction between quantitative and qualitative disclosures about the nature and extent of risks associated with financial instruments. The amendments have also removed the requirement to disclose the following:

- Maximum exposure to credit risk if the carrying amount best represents the maximum exposure to credit risk;
- Fair value of collaterals; and
- Renegotiated loans that would otherwise be past due but not impaired.

The application of the above amendment simplified financial risk disclosures made by the Company.

Other amendments and interpretations to standards became mandatory for the year beginning 1 January 2011 but had no significant effect on the Company's financial statements.

(b) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Company

Numerous new standards, amendments and interpretations to existing standards have been issued but are not yet effective. Below is the list of the standards and amendments to existing standards that are likely to be relevant to the Company. However, the directors are yet to assess the impact on the Company's operations.

Standard/ Interpretation	Title	Applicable for financial years beginning on/after
IAS 1	Presentation of financial statements	1 July 2012
IFRS 9	Financial instruments part 1: Classification and measurement and part 2: Financial liabilities and De-recognition of financial instruments	1 January 2015
IAS 27	Separate financial statements	1 January 2013

NOTES TO THE FINANCIAL STATEMENTS - 31 MARCH 2012

Standard/ Interpretation	Title	Applicable for financial years beginning on/after
IAS 28	Investments in associates and joint ventures	1 January 2013
IFRS 10	Consolidated financial statements	1 January 2013
IFRS 11	Joint arrangements	1 January 2013
IFRS 12	Disclosure of interests in other entities	1 January 2013
IFRS 13	Fair value measurement	1 January 2013

Current and deferred income tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in the statement of comprehensive income.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations is subject to interpretations and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Foreign currency translation*(a) Functional and presentation currency*

Items included in the financial statements are measured in United States dollars (USD), the currency that best reflects the economic substance of the underlying events and circumstances relevant to the Company ("the functional currency").

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

Available-for-sale financial assets

Available-for-sale investments are non-derivatives that are either designated in this category or not classified in any other categories.

They are included in non-current assets unless management intends to dispose the investment within 12 months of the reporting date.

Available-for-sale investments are initially recognised at fair value plus transaction costs. They are subsequently remeasured at fair value. Gains and losses arising from changes in fair value of securities classified as available-for-sale are recognised in equity.

Fair values for unlisted equity securities are estimated using comparable recent arm's length transactions, applicable price/book value, price/earnings or price/cash flow ratios or discounted cash flow analysis refined to reflect the specific circumstances of the issuer. Fair value of quoted securities are derived from quoted bid prices. Equity securities for which fair values cannot be measured reliably are recognised at cost less impairment.

On disposal of an investment, the cumulative gain or loss that was recognised in equity plus the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of comprehensive income.

Cash and cash equivalents

Cash and cash equivalents includes deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the statement of financial position.

Revenue recognition

Dividend is recognised when the Company's right to receive payment is established.

Expense recognition

Expenses are accounted for in the statement of comprehensive income on an accrual basis.

NOTES TO THE FINANCIAL STATEMENTS - 31 MARCH 2012

Equity

Ordinary shares are classified as equity.

Impairment of available-for-sale investment

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in profit or loss, is transferred from equity to profit or loss. Reversals of impairment losses in respect of equity instruments classified as available-for-sale are not recognised in profit or loss. Reversals of impairment losses on debt instruments are reversed through profit or loss, if the increase in fair value of the debt instruments can be objectively related to an event occurring after the impairment loss was recognised in profit or loss.

Financial instruments

Financial assets and financial liabilities are recognised on the Company's statement of financial position when the Company has become a party to the contractual provisions of the financial instruments.

Financial instruments are initially measured at fair value. Subsequent to the initial recognition, they are measured as set out below:

Other receivables

Other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Trade and other payables

Trade and other payables are stated at their nominal value.

Amount due to ultimate holding company

Amount due to ultimate holding company is recognised at proceeds received net of capital repayment.

Derecognition of financial assets and financial liabilities

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

The rights to receive cash flows from the asset have expired;

The Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass through" arrangement; or

The Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

Related parties

Related parties are individuals and companies where the individual or company has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions.

Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the

NOTES TO THE FINANCIAL STATEMENTS - 31 MARCH 2012

provision due to the passage of time is recognised as a finance cost.

Comparatives

Where necessary, comparatives figures have been amended to conform with changes in presentation of the current year.

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Fair value of unquoted instruments

The Company holds available -for-sale financial asset that is not traded in an active market. The fair value of the investment in Study Places Inc is based on the value of its investment in Zaptive Internet Services Pvt Ltd (ZIPL's) and ZISPL's further holding in Educomp Solutions Ltd ('ESL') which is the primary asset after transfer of the ZISPL business and assets. ESL is a company listed on the National Stock Exchange.

The directors use their judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at each reporting date.

4 FINANCIAL RISK MANAGEMENT

The Company's activities expose it to the various types of risks: market risk (including interest rate risk and currency risk), credit risk and liquidity risk.

The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

Currency profile

The Company's financial assets and liabilities are denominated in United States dollars.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company has no significant currency risk exposure as all its financial assets and liabilities are denominated in USD.

Interest rate risk

The Company has no significant exposure to interest-rate risk.

Price risk

The Company is exposed to equity securities price risk as it has classified its investment in Study Places Inc. ("SPI") as available-for-sale financial assets which are valued on the basis of the market value of SPI's investments in Educomp Solutions Ltd ("ESL").

The Company monitors the market value of ESL and management assesses the risk of potential loss to the company of holding these shares on a long-term or short-term basis. These shares are readily marketable as ESL is listed on the National Stock Exchange of India.

The fair value at 31 March 2012 would have no effect (2011-higher / lower by 3,924) if the price of ESL would have increased / decreased by 5 % respectively. Accordingly, fair value reserve would have been higher / lower by an equivalent amount.

Credit risk

The Company takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. The Company's main credit risk concentration is cash and cash equivalents. The Company manages credit risk by banking with reputable financial institution.

Liquidity risk

The Company manages liquidity risk by maintaining sufficient cash reserves, through funding from its ultimate holding company. The table below summarises the maturity profile of its financial liabilities at 31 March 2012 based on contractual undiscounted payments.

The capital management process is determined and managed at the ultimate holding company level.

Fair values

The carrying amounts of available-for-sale financial assets, cash at bank, amount due to ultimate holding company and payables approximate their fair values.
